## **Angel**

## **Pure Prairie League**

There's a silver moon in the midnight sky
And lovers are heart to heart
But love is a shadow
Lost in your eyes
And time has taken us apart

But it's so far away and so long ago
It's still so strong I want you to knowYou're still right here in my heart
Where you've been right from the start

Still right here in my heart oh babyThere's a hollow sound in this empty room

Echoes in the dark

I wish I could wake and find you here Give us another chance to start But night after night day after day

I love you so much I still have to sayYou're still right here in my heart Where you've been right from the start

Still right here in my heart oh babyWell I wonder what you're feelin' Do you ever feel the same

When you listen to your heart

Do you ever hear my nameYou're still right here in my heart

Where you've been right from the start

Still right here in my heart oh baby
