Lightning (Lost Recording #4)

Mark Diamond

The things that id do
The buildings id burn
To show u my love just what your worth
The things id do
The bridges id burn
Does that make me a fool for loving her

So baby bring me down oh I know some place west of the cascades where I can take u when,your down sing u a song from the top of my lungs, baby when u feel down were u feeling down

When I see the lightning then hear the thunder I think of u when we were younger

So baby bring me down oh I know some place west of the cascades where I can take u when,your down sing u a song from the top of my lungs, baby when u feel down were u feeling down

Then all of the things that we try to hide we'll keep them away from,all the light

Baby let it all out now hope,u know id
