

Goodbye

Save Ferris

In deep in the heart of every man
Lies a hidden dream or plan
To be a millionaire
Life without a care Hey, cool cat
Does this apply to you?
Oh, don't you lie, don't you lie
'Cause you can't hide the truth I can see what's behind those eyes
Tongue so twisted from tellin' lies
And you might think you're strong
But you better not treat me wrong or else, I'll say so long Goodbye, I never want to see you again
Goodbye, I don't want to be your friend
So long, now we've reached the end
Time for me to turn that bend When time has run away
And there's no need for me to stay
And lose myself to you
And be abused by you I don't need the pain
From your mind games
When you try them again
I won't be there for them to work anymore Now you're back and you're beggin' please
Crawling on your hands and knees
You thought you were a star
But now here you are, you haven't traveled far Goodbye, I never want to see you again
Goodbye, I don't want to be your friend
So long, now we've reached the end
Time for me to turn that bend When time has run away
And there's no need for me to stay
And lose myself to you
And be abused by you I don't need the pain
From your mind games
When you try them again
I won't be there for them to work anymore
