Outer Space

Ace Frehley

You said you wanted my love
To be your party, your game
But when I came from above
I looked around but you turned awayBut now you're scratching and crawling
Your way up from the grave
You should have stayed in the dirt, girl
It's like I told youIt's like I told you, I came from outer space
That's how I know your name
Just like I told you, I came from outer space
I wanna take you awayYou took a drink of my sweet love
And then the poison took
You hooked me up to your sick machine
And then I blew you upYou were one in a billion
Before the button was pushed
You should have stayed in the dirt, girl
It's like I told youIt's like a told you, I came from outer space
That's how I know your name
I'm sick and tired of the human race
I wanna take you awayIt's like I told you, I came from outer space
That's how I know your name
I'm sick and tired of the human race
I want you by my sideI wanna take you to heaven
Take you away from this hell
I wanna take you to heaven
Take you away from this hellIt's like a told you, I came from outer space
That's how I know your name
I'm sick and tired of the human race
I wanna take you awayIt's like I told you, I came from outer space
That's how I know your name
I've given up on the human race
I'm gonna blow 'em awaySo let me take you to heaven
Take you away from this hell
I wanna take you to heaven
Take you away from this hellI wanna take you to heaven
Take you away from this hell
The Earth is rolling a seven
This place is gonna be fried
