

There's Us

Alexz Johnson

There's me looking down at my shoes
The one smiling like the sun that's you
What were you thinking
What was the song inside your head
There's us going on about a band
Working out, how we play our hands
I lay there dreaming
Later on alone on my bed
If I was stupid
Maybe careless
So were you
Not everything is supposed to come true
Some words are best unsaid
Some love is not really love at all
I'll keep everything I shared with you
And that's enough, there's us
Freeze, frame, I'm not about to cry
It's too late for us to change, why try
I've got a camera
Tucked away inside my heart
If I'm a loser
Or just unlucky
So are you
Not everything is supposed to come true
Some words are best unsaid
Some love is not really love at all
I'll keep everything I shared with you
And that's enough, there's us
Somewhere between then and now
I looked away when you said
We'll never change
And if you think what might have been
You lose today
And we've got songs to play
Not everything is supposed to come true
Some words are best unsaid
Some love is not really love at all
I'll keep everything I shared with you
And that's enough, there's us
Not everything is supposed to come true
Some words are best unsaid
Some love is not really love at all
I'll keep everything I shared with you
And that's enough, there's us
There's us
There's us
