Brother

The Organ

Here we go
They're back again
Look alive
Warn your friends
We are warm
And we are safe
Enjoy it while you can
Before things changeWe have got to take cover, brother
We have got to take cover, brotherLie down
In a field if you can
And look at the night sky
Oh, where does it end?
Sometimes it hurts
When you care about me
But it's gonna hurt more
When they take you from meWe have got to take cover, brother
We have got to take cover, brotherHere
We go again
No midnight knocks
or explosions
Oh, maybe it's all
Made up in our heads
This happens to me when
I'm bored or depressedHere is the best
Part of the song
Where I admit
That I might be wrong
'Cause if they are good
And they are right
Then they'll have their rapture
One of these nightsWe have got to take cover, brother
We have got to take cover, brother
We have got to take cover, brother
We have got to take cover, brotherHere's
The part of the song
Where I admit
That I might be wrong
'Cause if they are good
And they are right

Then they'll have their rapture
One of these nights
But if they are wrong
