

# Waiting For The Moon

## Tindersticks

We know this place  
Where we are doesn't matter  
We know this place  
We've been here before  
The stars are out  
Waiting for the moon  
The stars are out  
Waiting for us  
Pull the blanket now  
Creep down the stairs  
Don't wake the little ones  
The lazy cats, the mice are in their homes  
The stars are out  
Waiting for the moon  
The stars are out  
Waiting for us  
Ease this raging mind, this raging love  
Sometimes it feels like a knife  
But not tonight  
Sometimes it turns like a knife in me, not tonight  
The stars are out  
Waiting for the moon  
The stars are out  
Waiting for us
