# And So It Goes

## Sara Gazarek

I thought we'd always be together
In my mind, there was no doubt
Our two hearts were bound forever
We would never be without
Spring to summer, falls to winter
Those that can just fly away
To find a place for them that's better
I guess here is where I'll stay
And so it goes
While we were busy with the details of our lives?
?everyday thinking time was on our side
I turned around and you were gone
And I?m left here with the words I never got around to saying
I don't know why, I guess I never thought our time could pass us by

Life for you took new direction
What I may never figure out
That nature goes about her business
With new surprises every day
And so it goes
While we were busy with the details of our lives?
?everyday thinking time was on our side
I turned around and you were gone
And I'm left here with the words I never got around to saying
I don't know why, I guess I never thought our time could pass us by
I turned around and you were gone
And I'm left here with the words
I never got around to saying
I don't know why, I guess I never thought
Our time would pass us by
