

# Gravity Grave (Live Glastonbury 93)

## The Verve

Get back, get back again and again  
I've been here since I can remember when  
My life is a boat, being blown by you  
With nothing ahead, just the deepest blue To me you're like a setting sun  
You rise then you're gone  
To me you're like a setting sun  
You rise then you're gone Come back, come back again and again  
I've been here since I can remember when  
Your world just spins whilst mine stands still  
Nothing's changed in your gravity grave To me you're like a setting sun  
You rise then you're gone  
To me you're like a setting sun  
You shine then you're gone
