

Stay You

Wood

I love the way you speak
And I love the way you swear
I love the way you walk around with your head held in the air
I love the way your words move
And I love the way you drive
I love the way you're scared of people scared to be aliveStay - stay you that's the toughest thing to do [x 2]I
love the way you dress upon a Saturday night
I love the way you never speak until it feels just right
I love the way you're spending all your money on yourself
I love the way you answer the phone and pretend you're somebody elseStay - stay you that's the toughest thing
to doAnd now I don't want to talk about the things you overcame
By dragging up the past I'll put you through it all again
I've got the greatest admiration for the way that you got through it
Couldn't ask nobody else to do it better than you do itStay - stay you
