

# You & I (feat Keke Wyatt)

## Avant

Wooh, ladies and gentlemen  
And all the lovers around the world  
I wanna talk about the one I love (Talk about the one I love)  
I know alot of times we forget,  
How they take good care of you  
But tonight  
I just wanna express the way I feel Oh baby!  
Funny how things have changed in my life now  
Whether near or far I wanna be where you are  
And, you're like a rose that blooms in my garden  
Innocent and sweet, my love you are  
But one thing I know girl Lovin' lovin' oohh, lovin' lovin' you  
Is easy, for me to do baby  
And, I will feel this way till the end of time (Ooh)  
Even though you've heard this a thousands times it's the truth  
Oh baby! You and I  
Together for always  
Baby I,  
Breathe every single breathe for you baby  
Ooh boy  
You and I  
One hell of a chemistry  
Baby I,  
I'm living out this life for you Oh darling  
I know that things in life are not perfect  
But when it comes to you  
You're all that and more baby (Ooh)  
Heavens my destiny when I'm with you  
The only place to be just you and me  
Oh whoa oh My life my life my life, is so incomplete without you baby (Oh ohh)  
I will feel this way to the end of time (Yeah)  
Even though you heard this a thousand times it's the truth  
Whoa baby You and I  
Oh together for always  
Baby I  
Breathe every single breathe for you baby  
Ooh boy  
You and I  
One hell of a chemistry

Baby I,  
I'm giving up this life for you oohOh baby  
I love you, I love you  
All of you, all of you,  
You're everything baby, yeahh  
Oho oho oh  
I love you baby, babe yeah  
I love you baby  
You make me complete  
Oh oh oh oh
