Style

Utopia

Style must not be underrated
Style is often overlooked
Style is never in the papers
I read it like an open book
Style
If you can't see the substance
Style shows how it's organized
Style is looking for your money
It's in the way you paint your eyesThere is always a way
A way things are done
I've been learning my abc's
I know what is 10, I know what is 1 inStyle is a naked look
Underneath your style
Style of a different place
Talking through your styleEven the way you hide it
Reveals the thing you hide
Your style may never cause a riot
It's still a style to have no styleThere is always a way
To light up a lamp
It's been a crazy year all around
The check never came
I can't let it cramp myStyle is a world for sale
You can't buy this style
Style that you can't resist
You won't cramp my style
