

Coming Down

Five Finger Death Punch

It's caving in around me
What I thought was solid ground
I've tried to look the other way, but I couldn't turn around
It's okay for you to hate me, for all the things I've
done I've made a few mistakes, but I'm not the only one
[Chorus] Step away from the ledge, I'm coming down
I could never be, what you want me to
You pull me under, to save yourself
You will never see, what's inside of me
I'll pull you under just to save myself
Was there ever any question, on how much I could take
You kept feeding me your bullshit, hoping I would break
Is there anybody out there, is there anyone who cares
Is there anybody listening, will they hear my final prayers

[Chorus]
Step away from the ledge, I'm coming down
I could never be, what you want me to
You pull me under, to save yourself
You will never see, what's inside of me
I'll pull you under just to save myself
It's getting in around me, it's tearing me apart
It's all coming down around me
Does anyone, anyone, care at all
I will never be, what you want me to
You pull me under, I pull you under
I could never be, what you want me to
You pull me under, to save yourself
You will never see, what's inside of me
I'll pull you under just to save myself
