Personal Energy

Pestilence

The temple of the soul
Home of the spiritual source
Blessed with powers we unfold
Human magnetism, uncontrolledPersonal energy
The magic of nature
The presence of ourselves
We cannot seePersonal energy, consciousness
Life towards the essence of eternityA domain of harmony
Captured past and future
A vision of reality
Divided structuresThe higher senses, polarity around all creatures
Increasing possibilities
Of self-discovery, energetic thoughts
Creating electricityPersonal energy
The magic of nature
The presence of ourselves
We cannot seePersonal energy, consciousness
Life towards the essence of eternityThe temple of the soul
Home of the spiritual source
Blessed with powers we unfold
Human magnetism, uncontrolledPersonal energy
The magic of nature
The presence of ourselves
We cannot seePersonal energy, consciousness
Life towards the essence of eternity
