

# Suburban Knights

## Hard-Fi

Suburban days, they last so long  
In shop and office, we sing our song we all sing  
We ain't got nothing, nothing to do  
A big fat nothing, nothing for me, nothing for you Suburban dreams, just out of reach  
Work till you die, that's what they teach you at school  
With that in mind, what's there to lose?  
My friends and I, doped up on TV fags and booze  
Hear them all singing We're the ones that you've forgotten  
But we will not be denied  
Coming out of the shadows  
We rock the satellites Suburban nights, they get so hot  
People get angry, we sing our song we all sing  
A global terror they say, we are at war  
But I ain't got time for that 'cause  
These bills keep dropping through my door  
Hear them all singing We're the ones you've forgotten  
Out of mind, out of sight  
Coming out of the shadows  
We rock the satellites All these people who criticize us well  
We're only saying what we're seeing with our own eyes  
This one way system it ain't, it ain't paradise  
Not everybody wants to race, wants to fight  
Hear them all singing We're the ones you've forgotten  
But we will not be denied  
Coming out of the shadows  
We rock the satellites We're the ones that you've forgotten  
Out of mind, out of sight  
Coming out of the shadows  
Coming live via satellite
