

Gotta Love Me (feat. Golden Day & M. Tomlin)

Kellee Maize

V1

This is for us broken girls
the puff pass, token girls, the showing off the ass,
the jokin' girls who think being funny is the only joy,
or strip to make the money or those who fade away from the drugs,
from the bad love from the extra pounds
drownin in shot rounds
fighting for a man who on your face puts his hand
I understand its hard
when this world its got bars
make your plan
to take change
and show you your value
lets go thru
and wow you
so you can heal
be an example for the babies
coming thru
cause they can feel your pain
they see it in your face
notice in your embrace
that we could love more fully
if we love ourselves
im not one to talk got, I've got my own bully
her names kellee, shes unruly
she trys to fool meHOOK 2x
you gotta love me
its the only be
cause when we love me
we can finally be free
to love you, to make dreams come true
we gotta start with I,
deep breathe hug yourself, release the tears from your eyeV2
You really are divine
when your hips sway,
when you dutty wine, no matter your size
and you can get the help you need
leave him if he makes you bleed
get up girl, get out your seat

show us all you are all a queen
cause you are and so am I
this is the time
for a feminine resurgence
we all messed up this world; its time for our service
mother earth is crying, she's right there at our side
she knows we didn't mean it, could forgive us just in time
for you to shine
for us to climb
we are now in our prime
the men are ready, it seems truly
give em a chance, they know not what they bid
put the whole planet there in a crib, beside your bed
now tell me you don't wanna be the mother,
you always knew that you didHOOK 2xV3
you are beautiful, you're perfectly suitable
for the goddess status, you're the baddest
you can do anything that you want to
you're the writer of your book
you are a fighter and the earth shook
when you arrived
cause she was pumped, through you she strived
to get humanity over the hump
of ego, greed and anything that isn't love
and did i mention, you are perfection
and you are destined
this is a lesson
you are a blessing
your are made of stars
u come from near and far
remember who u are
u are are made of starHook 2xOUTRO
Ladadada
