

# Vision

## Beatsteaks

i've been watching from behind the scene  
i worry you've been given bad routine  
forget the damage they have done to you  
i make sure i keep an eye on you sick now - are you meant to be  
broke down to disillusion street  
shake now - got to hear me out  
i come down this is my way out  
got a vision you can live in  
got a vision to be given revolving all around the cash machine  
it don't work, you know what i mean  
there ain't no time to count the friends you've got  
there ain't no time to miss a thing you've lost sick now - are you meant to be  
broke down to illusion street  
shake now - got to hear me out  
i come down and figure out  
i keep my big black eye on you
