

# See What You Can Be (feat. Todd Rundgren)

[Nazz](#)

Let's talk about the things you wonder  
Things that you're trying to hide  
When words slip up you drag them under  
Making me stand outside But from all I can see  
You've become somewhat frightened of me  
But my thoughts run high  
Of what we could be If we didn't stop to think  
Of what could go wrong on our way there  
I want you to see what you can be  
See what we can be if we try Here is a thing we can't skip over  
I think you should be around  
What one can do, can two do better  
Don't try to drag the thing down If I thought I could be  
Something more than I thought I could be  
I would take off and fly if it were me I don't need to be reminded  
Of the things I don't believe in  
I want you to see what you can be  
See what we can be if we try If I thought I could be  
Something more than I thought I could be  
I would take off and fly if it were me I don't need to be reminded  
Of the things I don't believe in  
I want you to see what you can be  
See what we can be if we try  
If we try, if we try
