Three Sides to Every Story (Remastered)

Coco Montoya

There's three sides to every story
Yours, mine and the whole darn truth
Three sides to every story
Yours, mine, the whole darn truthAll these lies, these alibis
Telling of you and me
There's three sides to every storyOh, I need to know
Where did you stay last night
Oh, you been told that
I ain't treating you rightJabbing each other, talking trash
If we don't stop, we won't last
There's three sides to every story, oh yeahWhere do we go from here?
How does our love survive?
The future looks so unclear
Through the dark and suspicious mindWe played too long into losing game
With no hand to hand
With no one left to blame
There's three sides to every storyWhere do we go from here?
How does our love survive
The future looks so unclear
Through the dark and suspicious mindWe played too long into losing game
With no hand to hand
With no one left to blame, yeah
Oh, there's three sides to every story
Ah, there's three sides to every story, oh yeah
