

# Down to the Bone

## Overkill

Take all and get that angry face  
Take fizy and get all in air  
Lacuna it's just a battle in your hair  
You will know it's been late  
Well you could lie make it all but rock just a little bit harder  
Can't stand here and have '  
Don't get to the '  
Going into the other side until they will see  
We just'  
And we only get down to the bone  
Come on man get into the other side  
But all will shine and we get on line  
Alright get now to the other side  
Hey man, you're blue and in your feet  
Shake it off now stare around here  
You lose but get you '  
You make it careful with they all  
Laugh just a little bit harder  
Once again I'm not enough with that fire  
All demons are fighting  
Come on into the other side  
Come on with your bare feet All we can do it get down to the bones  
Get out into the other side  
We so damn shy' ooh God dam it get to the other side  
What I know it's all I know  
And what we don't it's all a story  
What I know it's all I know  
And what we don't it's all a story  
Come on over to the other side  
Come on over to the other side  
Come on over to the other side  
Down to the bone  
Come on over to the other side  
Come on over to the other side  
Come on over to the other side  
Down to the bone
