

Please Wait

Color Plus

Let's just say for the moment that I said to be quiet
when I know I'll be hoping that my wrongs will be right
lets just say, lets just say
I'm sorry, lets just be, let's just be
well, please wait for me I can't even tell you how much i need to see you, see you again
please do your part to be kind
'cause you know its my heart milking my mind
you would leave and i would stay
it's not like me to be this way please wait for me
i can't even tell you how much i need to see you, see you again
just wait for me
i can't even tell you how much i need to see you, see you again
my heart is breaking
my heart is shaking
its breaking
please, wait for me
i can't even tell you how much i need to see you again
