This Wasn't In Our Plan

The Early November

You've only two hours

Before everything is lost

And swallowed by light

So do this with care

But don't waste your time
'cause this is all we've gotYou're making time

You've got the cure

But the virus by your side

You wait till it's right

Then you strike

And you bring out all you've gotMaybe someday you'll find a way to balance pressure

But you're slow and you're jealous like a child

Waking up things that found a way to dream forever

Get your gun 'cause the flock is flying inYour dress is nice

Casual, but then strangely eloquent

Your eyes are wide

You got them once

Got them twice now three's a charmMaybe someday you'll find a way to balance pressure but you're slow and you're jealous like a child

Waking up things that found a way to dream forever Get your gun 'cause the flock is flying inI'm watching you now

You're right in my sight

I'm supposed to take you out

And end this tonight

But given this thought

It's harder to fire

'cause you don't have a clueMaybe someday you'll find a way to balance pressure
But you're slow and you're jealous like a child
Waking up things that found a way to dream forever
Get your gun 'cause the flock is flying in
