

# Monolithic Egress

## of Montreal

Yeah no blood hunger palisades  
I'm inside of the mirror  
Oh I don't saw this, get on pick  
It was so much louder now that we almost speak  
A silent messin' inside my mind  
You never took me home  
Just been together for forever  
We, we sit in silently  
I think I'm panted in the dead of the sky  
Cuz I can cool and shut in soft metals if you up  
So the more you could enjoy and have this in  
Of the failures but you want me to keep  
A silent messin' inside my mind  
We are the wrapping of the every [?] spring  
No fun out of that stake, I can only be better the stages [?]  
Do it rock, close and [?] of the sea  
Sound on the free time  
Again and again and again  
I picture you as a way found in Pacific  
Wait, get up  
We beyond on point of your childhood  
Sorry can't hang you  
And all alone on miserable returns  
Hating myself like I want that you want me to do  
There is always the passion of [?]  
And my head sais she knows me  
What do you know?  
Should let all to get each other  
Just to feel like we move in pieces  
And all that will always mean to  
Posses you and eyes stuck  
And my celebration of our century plays  
Right when we set this [?]  
You can take on me but you must expect the same  
Different man cuz you not caught up in some fucking name  
A silent messin' inside my mind  
There's no sympathy for the ops  
All the brutal walls that will leave by their name  
Just as our victims suicides, future is a posture
