Home To You This Christmas

Blue Rodeo

Stuck here in this hotel room with you so far away
Temperature is dropping and a storm is on its away
Saving all my money up to get myself home to you this Christmas

There use to be some work around them our town went bust
No one wants to leave there but we all do what we must
Saving all my money up to get myself home to you this Christmas

I watch all the couples out walking in the snow
Holding hands and laughing everywhere they go
In my mind I've already left town
It's only three more days till I touch down
And when I open up the door, see your pretty face
Well, I know that it was worth it and I'm in the right place
Saving all my money up. get myself home to you this Christmas

I watch all the couples out walking in the snow
Holding hands and laughing everywhere they go
In my mind I've already left town
It's only three more days till I touch down

And when I open up the door, see your pretty face
Well, I know that it was worth it and I'm in the right place
Saving all my money up to get myself home to you this Christmas

I watch all the couples out walking in the snow
Holding hands and laughing everywhere they go
In my mind I've already left town
It's only three more days till I touch down

All my friends go out at night, tell me I should go
There's so much I don't tell them, things they'll never know
I'm saving all my money up to get myself home to you this Christmas

Home to you this Christmas
