Lost Souls

Pestilence

Instinct of immortality
Become a part of eternity
Spirits of evil into the essence
The very creature of a living entitySucceeding lives
A black soul's purification
A new being on the path of evolution
The way to its destinationCycle of rebirth
The spiritual law of continuity
Mirages of earthly existence
It shall not cease with the bodySurvival of death
From one incarnation into another
Reflections of an unknown reality
Summons what can't be discoveredFight to release from the cycle
To reach the divinity
From where it arose, once more descend
Into an inner mental unityBirth into a new life
Loss of personality
The immortal element in man
Shall live a real life in infinitySurvival of death
From one incarnation into another
Reflections of an unknown reality
Summons what can't be discoveredLost souls
Lost souls
