

# Feel What I Feel

Kat Deluna

Why can't you smile, shake a hand  
Joke around when you're under?  
Doesn't take that much to do it  
Sing a song when you're down  
'Cause I know that you wonder  
What is coming over me  
Don't you keep it in, gotta let it out  
Swing your head around  
Tell 'em what you're all about  
Just believe it and get with it  
And when you hear the sound  
Don't you know that I was made for this music?  
When I hear it, take a ride and I lose it  
All my worries step aside  
When I hear a simple melody  
Let me in like the wind, let me take it higher  
Make you feel what I feel  
I'll be that song that you play over and over  
Make you feel what I feel  
Can you feel me?  
Can you feel me?  
Can you feel me?  
See I don't mind, I don't hide  
Because, 'cause I'm open  
What I gotta do to prove it?  
Walk a mile in my shoes  
Will you dare take a journey?  
With me is where you wanna be  
Don't you keep it in, gotta let it out  
Swing your head around  
Tell 'em what you're all about  
Just believe it and get with it  
And when you hear the sound  
Don't you know that I was made for this music?  
When I hear it, take a ride and I lose it  
All my worries step aside  
When I hear a simple melody  
Let me in like the wind, let me take it higher  
Make you feel what I feel

I'll be that song that you play over and over  
Make you feel what I feel  
Can you feel me?  
Can you feel me?  
Can you feel me?  
Don't you know that I was made for this music?  
When I hear it, take a ride and I lose it  
All my worries step aside  
When I hear a simple melody  
Let me in like the wind, let me take it higher  
Make you feel what I feel  
I'll be that song that you play over and over  
Make you feel what I feel  
Don't you know that I was made for this music?  
When I hear it, take a ride and I lose it  
All my worries step aside  
When I hear a simple melody  
Let me in like the wind, let me take it higher  
Make you feel what I feel  
I'll be that song that you play over and over  
Make you feel what I feel  
Can you feel me?  
Can you feel me?  
Can you feel me?  
Can you feel me?  
Can you feel me?  
Can you feel me?  
Can you feel me?  
Can you feel me?  
Can you feel me?
