

# Always Will

Steve Martin & Edie Brickell

Oh oh ohh  
You keep tellin' me  
That I'm way too sure  
Of you lovin' me long time  
But I bet you always will In so many ways  
I've rubbed off on you, yeah  
And you've been lovin' me long time  
And I bet you always will We're inseparable  
'Cause your soul's with mine's  
And you've been lovin' me so long  
And I bet you always will, ooh We could be on separate planets  
Mars and Venus, heart to heart  
No spaces between us  
You know, you know hearts don't lie  
I can stay here and reside in this here city  
And you go sail clear across the ocean  
I bet you always will yeah You can't take away and you can't forget  
That you been loving me long time  
And I bet you always will  
You won't worry, no 'cause it's evident  
That you been loving me so long  
And I bet you always will We could be on separate planets  
Mars and Venus, heart to heart  
No spaces between us  
Because you know, you know, hearts don't lie  
I can stay here and reside in this here city  
And you can sail the ocean  
I bet you always will We could be on separate planets  
The Earth or the Moon, heart to heart  
We're still in tune  
And you know, you know, hearts don't lie  
I don't even care if we're not together  
Because that's the part that never lasts forever  
I bet you always will We could be on separate planets  
Mars and Venus, heart to heart  
No spaces between us  
Because you know, you know, hearts don't lie  
I can stay here and reside in this here city  
And you can sail the ocean

I bet you always will I bet you always will, always will  
I bet you always will
