Gone

SR-71

Do you feel the need To laugh behind my back? Does it make up for All the things you seem to lack? But I see through you Jealousy can't make you strong I'll walk right through you You'll close your eyes and I'll be...Gone...do everything to prove you Wrong...You're the ones that don't Belong...Now you finally see that I just can't stay in one place Where I get torn down When there's nobody else aroundWhat doesn't kill me Only makes me strong If you can't feel me Just close your eyes cause I'll beGone...do everything to prove you Wrong...You're the ones that don't Belong...now you finally see that I just can't stay in a place Where I get torn down When there's nobody else aroundAll my life I've tried to find My place where I fit in Now I find in the dark I'm blind To what everybody else thinks I amGone...do everything to prove you Wrong...you're the ones that don't Belong...Now you finally see that I just can't stay in a place Where I get torn down When there's nobody else around
