Dragon Ryder 13

Cathedral

Flames are high, lightning fueling my veins
Dragon appears, I saddle up again
Purple rain, anguished odyssey
Cosmic Babylon, destiny, yeahHold my fire tonight, it's killing me
Burn dragon ryder high into the next world
Thirteen hours with thirteen minds
Bells toll eternally bleeding my visionSpectral sky, phantom galaxy
King of fire chasing after me
Liquid planets melt into my eyes
Vision is gone, chaos ignitesHold my fire tonight, it's killing me
Burn dragon ryder high into the next world
Thirteen hours with thirteen minds
Bells toll eternally in this prisonRadiation, nuclear heaven
Sun turns inside out
Warheads flying from the burning moon
Invisible in magnitudeBlack corona, supernova
Orion dwarfed from sight
Cosmic halo of the void ignites
We descent into a realm of iceSee if you can take it higher
High as low as I can goFreeze my fire tonight, I'll take the end
Glass dragon ryder die, unveil the next world
Thirteen planets in thirteen dreams
Transport by death machine, beast of wisdomCrystal world in coma fantasy
Pale horse brings a burning key
Wings of hell to black rainbows die
Awake again, only half aliveHold my fire tonight, it's killing me
Burn dragon ryder high into the next world
Thirteen hours with thirteen minds
Bells toll eternally bleeding my vision
