

# Dragon Ryder 13

## Cathedral

Flames are high, lightning fueling my veins  
Dragon appears, I saddle up again  
Purple rain, anguished odyssey  
Cosmic Babylon, destiny, yeah Hold my fire tonight, it's killing me  
Burn dragon ryder high into the next world  
Thirteen hours with thirteen minds  
Bells toll eternally bleeding my vision Spectral sky, phantom galaxy  
King of fire chasing after me  
Liquid planets melt into my eyes  
Vision is gone, chaos ignites Hold my fire tonight, it's killing me  
Burn dragon ryder high into the next world  
Thirteen hours with thirteen minds  
Bells toll eternally in this prison Radiation, nuclear heaven  
Sun turns inside out  
Warheads flying from the burning moon  
Invisible in magnitude Black corona, supernova  
Orion dwarfed from sight  
Cosmic halo of the void ignites  
We descent into a realm of ice See if you can take it higher  
High as low as I can go Freeze my fire tonight, I'll take the end  
Glass dragon ryder die, unveil the next world  
Thirteen planets in thirteen dreams  
Transport by death machine, beast of wisdom Crystal world in coma fantasy  
Pale horse brings a burning key  
Wings of hell to black rainbows die  
Awake again, only half alive Hold my fire tonight, it's killing me  
Burn dragon ryder high into the next world  
Thirteen hours with thirteen minds  
Bells toll eternally bleeding my vision
