

Just the Same

Jefferson Starship

There's a light from afar
Like some distant star
It doesn't really matter

Where you are, where you areOne man was happy and one lived in sorrow

Overseer said they'll meet tomorrow

One man was wealthy, one had to borrow

Overseer said they'll meet tomorrowThere's a light from afar

Like some distant star
It doesn't really matter

Where you areMoon's silver face, dark shadows on the wall

Light playing games as the evening falls

And when the sunshine, can't warm your heart again

Soar with the starlight on the evening windThere's a light from afar

Like some distant star
It doesn't really matter

Where you areThere is a way even though your heart is broken

Now by the close of one door another opens

Leave your heat wide open now, door will openOne man was happy, one lived in sorrow

Overseer said they'll meet tomorrow

Oh it's just the same, yeah it's just the same

It's just the same, yeah it's just the same

Yeah, yeahThere's a light from afar
Like some distant star

It doesn't really matter

Where you are, where you are
