

Body Talk

Lemar

Tonight you gotta trust me, girl
It's all about actions, not about words
Got plans for you, what you want me to
Girl, I will do, you can pick and choose You know that I'll lay it on
On the back of my bike you'll be holding on
In the day take pictures in the sun
In the night let the city lights turn us on We can take it back to the crib
You can show me what you're working with
Open up and let me in
Let your body do the talking Now that we're finally all alone
I'm gonna give you something worth waiting for
So let's just hurry and get it on
Let your body do the talking Let your body do the talking
Let your body talk
You can let your body talk
Let your body do the talking
Let your body talk
Just let your body talk Come on Wake up, it's a brand new day
And I've got plans to make you happy
Lace you with diamonds, a girl's best friend
Just watch me closely, I'll break you in Come on, let's hit the club
No time for talking, just rave non-stop
As the tempo slows, it's time to leave
As you look in my eye, you know what I need We can take it back to the crib
I can show you what I'm flexing with
Open up and let me in
Let your body do the talking Now that we're finally all alone
I can give you that something you've been waiting for
So let's just hurry and get it on
Let your body do the talking Let your body do the talking
Let your body talk
You can let your body talk
Let your body do the talking
Let your body talk
Just let your body talk Let your body do the talking
Let your body talk
You can let your body talk
Let your body do the talking
Let your body talk

Just let your body talk So many things I'd like to do
So many ways to make your body move
Now you're home with me
We can have a private party
Come get down with me So come on Get down through the night
It's alright, so come on Let your body do the talking
Let your body talk
You can let your body talk
Let your body do the talking
Let your body talk
Just let your body talk Let your body do the talking
Let your body talk
You can let your body talk
Let your body do the talking
Let your body talk
Just let your body talk Come on
