Everytime I Hear Your Name

Cascada

When you walked away from me,
And said your last goodbye
I never thought that six months on
You'd still be in my life
I have tried to forget
Get you out of my head
But the memories won't fade
I can run I can hide from this feeling inside
But the pain won't go away
Cause every time I hear your name
The world stops for a moment
Baby with a single word
I can see your face again
Cause every time I hear your name
The world stops for a moment
And I'm taken back to what we had
Every time I hear your name

Now I'm sure you've found a girl
To fill my empty space
But I'm stuck with the love that we shared
That time just can't erase
I have tried to forget
Get you out of my head
But the memories won't fade
I can run I can hide from this feeling inside
But the pain won't go away
Cause every time I hear your name
The world stops for a moment
Baby with a single word
I can see your face again
Cause every time I hear your name
The world stops for a moment
And I'm taken back to what we had
Every time I hear your name
And I'm taken back to what we had
Every time I hear your name
