National Anthem

Georgia Tech Glee Club

Does being in debt feel just like a long lost friend?
Well just wait around 'cause the desperation's kicking in
Yeah its already starting to mix with one of my best pieces of fiction
And it's called "I'll be getting by and I'll make ends meet"
Does the 40-hour week have you bent at the knees
And you can't even see that everything's kept just out of reach
Ever get that funny feeling that your future's not going to be bought cheap
And that for sale sign that's hanging 'round your neck might as well spell defeat
Yeah its already starting to mix with one of my best pieces of fiction
And it's called "I'll be getting by and I'll make ends meet"

Does the forty hour week have you bent at the knees and you can't even see that everything's kept just out of reach
My American dream is to have it, a little bit better than my parents ever had it
My American dream is to have it, a little bit better than my parents ever had it
My American dream is to have it, a little bit better than its just a force of habit
My American dream is to have it a little bit, better than my parents ever had it.
