

Triage

George Hrab

It's now or never, whether we try
I can't remember why

And I can't believe that you were together
I don't believe you let her inside
I can't believe she wrote me the letter
Why did you bother to leave me alive

Alive and ticking inside

We said forever, until we die
But we're all offenders
We all lie

I can't believe that you were together
I don't believe you let her inside
I can't believe she wrote me the letter
Why did you bother to leave me alive

Alive and ticking inside

I don't believe that you were together
I can't believe you let her inside
I don't believe she wrote me the letter
Why did you bother to leave me alive...
