## Tristania

Theres a maze  
Of nights and days  
You dont fear the time  
Stars and sky define the road  
And they clear our sight  
I will be your eyes and ears  
Walk with me tonight  
Somewhere ahead the gate is open  
And the woods alive Shadows soon rise  
I will move on  
Leave you behind  
Your flame is burning  
Kiss me goodbye  
Its getting late  
Im still your shield  
The world keeps turning Wounds need time to heal Hush my child  
Now do not weep  
Put your hand in mine  
Ive got promises to keep  
I will stand you by  
I have given life to you  
Find your strength my child  
There is a magic world awaiting  
Made of light and smiles
