To The Skies

Kaskade

Over and over, again and again
Just going through motions
We can take off and go somewhere
Where life can become our dream
Away from this world, let me
Into your heart, I'll set it free
(Remember)
When the sun is running tired
Put your head up to the skies
Simple words I say are true
Every moment I'm with you
When the evening fashions die
Lift your head up to the skies
In my eyes you'll see the truth
Every moment I'm with you
Light of the day is shining bright
Don't be afraid
To cross the line and feel my hand
I'll be waiting on the other side
Trust me, it never felt
So alive, take a breath
When the sun is running tired
Put your head up to the skies
Simple words I say are true
Every moment I'm with you
When the evening fashions die
Lift your head up to the skies
In my eyes you'll see the truth
Every moment I'm with you
When the sun is running tired
Put your head up to the skies
Simple words I say are true
Every moment I'm with you
When the evening fashions die
Lift your head up to the skies
In my eyes you'll see the truth
Every moment I'm with you
Every moment I'm with you
