

Lovers At First Sight

Lionel Richie

Love can have its mysteries
Some strange, enchanted notion
You can't explain just how it begins
A feel, a smile, a potion
But something goes off in your head
You can't believe the words you just said
It's not so hard to see the light
Lovers at first sight When the right one comes along
There is no hesitation
You wonder how you lost all control
It's just a revelation
And that's the way I felt with you
One glance was all it took and I knew
You and I were just so right
Lovers at first sight (Je t'aime beaucoup, mon chérie)
I love that you love me
(J'ai envie d'être près de toi)
I want you too
'Cause when we are together
There is no place in this world that I'd rather be
Girl,
(Dura-t-il pour toujours?)
Yes, it's forever
(Est-ce que tu me promets?)
I promise my chérie
'Cause you know nothing will change
The way we're gonna live together
In our little fantasy Chorus:
That's the way I felt with you
One glance was all it took and I knew
You and I were just so right
Lovers at first sight
