Self-made

D-Passion

No, no, no
Into the defect
The reason, the source
Of all this misery and extract it forever
What heals me kills me
I'm a natural assassin, a massacre in action
I've never known remorse or felt any compassion
This is my drug of choice
The reason demons rejoice
My rage remains a beast untamed
I bet you'll remember me now
Glutton, I am heartbreak and depression
Regret without redemption
A wounded animal afraid of my reflection
I am an epidemic, this is a crime of passion
The willing weak deserve defeat
The penance will be savage
I bet you'll remember me now
I bet you'll remember me now
Bi-polar, self-abortion, mind fuck
Can't escape these chains of shame
I'm stuck, swollen in the mud
Barely standing still
Hungry for the hunt and the thrill of the kill

Come on, I've always been a shadow
Content with my disease
You'll never see it coming
'Cause you never notice me
Unload, words are the remedy
Words are the remedy
What heals me kills me
What heals me kills me
What heals me kills me
What heals me kills me
What heals me kills me
What heals me kills me
What heals me kills me
What heals me kills me

What heals me kills me
The plague rages on
I've built myself out of ash and agony
I am ready, I am I
I am my own creation, I am self-made
I am my own creation, I am self-made
I am my own creation, I am self-made
Destroyers, I am I
A bone heals, a bruise fades but art is forever
