

# Fallen Star

## Blood On The Dance Floor

We're so in love  
We did all the drugs  
Fell down in clubs  
Our hearts just raised upWe kissed in the dark  
In the back of your car  
We cuddled in the park  
You shine like Noah's ArkPain inside  
Crashes and glides  
I can't decide  
Your heart was my guideIt's been to long  
You're my perfect drug  
But the worlds all wrong  
I hope you sing alongWherever you are  
You'll be my star  
Near or far  
You'll always be my one(2X)  
Kiss me goodnight  
You say it's all right  
This can't be goodbye  
My heart just diesEarth is dying  
Kids are crying  
The plans we've made  
Just rot awayYour angel wings  
Will shine on me  
Like the blood on the strings  
My heart just falls in seemsYou fall in front of me  
As we cast away in the sea  
I'll be your dream machine  
A life full of luxariesYou died in that crash site  
Just like our love life  
Blinded by headlights  
We fell in front of bright lightsLike Jack and Sally  
On top of Death Valley  
Down below in Soulthern Cali  
We lived out our grand finaleWherever you are  
You've stolen my heart  
Near or far  
You'll always be my starSo, kiss me goodnight  
Say its all right

This can't be goodbye  
My heart just diesEarth is dying  
    Kids are crying  
    The plans we made  
Just rot awayWherever you are  
    You've stolen my heart  
        Near or far  
You'll always be my starLike Jack and Sally  
    On top of Death Valley  
    Down below in Soulthern Cali  
    We lived out our grand finale
