Higher

Lia Ices

I got wings and baby I am made for flying
I seen apparitions as I keep on getting higher
You gotta keep me close, you gotta let me go
I said, I got wings and baby I am made for flying
I seen apparitions as I keep on getting higher
The farther up the farther up that I can go now,
The nearer into to you I promise I will fall down
You gotta keep me close, you gotta let me go
The farther up the farther up that I can go now,
The nearer into to you I promise I will fall downI will never leave you lonely
I will never leave you lonely
I will never leave you lonely
I will never leave you lonelyI got the city and the desert all in my mind
But I'm up here to look for somewhere else that I can memorize
You gotta keep me close, you gotta let me go
Desert, city I got u memorized
But I'm really needing somewhere else to put inside my mind
When I am very far, I know right where you are
And I'll always be looking for you you
When I'm higher up from a from a different view ya
I will always be looking for you when i'm higher up from a different view
I will always and I will always be looking for you
Sometimes we need to see each other from a different viewI will never leave you lonely
I will never leave you lonely
I will never leave you lonely
I will never leave you lonely
