

Crying Over

[Patty Griffin](#)

Light it up, baby
Light up that fire
Cause I don't know what's gonna save me
From the cold now And these sorrows I'm crying over
And these sorrows I'm crying over Embrace me, embrace me with your kind love
It's all I've ever wanted, all I've ever dreamed of
In all of this dreaming of silver and gold
Is something to break this winter so cold And these sorrows I'm crying over
And these sorrows I'm crying over We go straight for the thunder, straight for the rain
Love leaves a mark and life leaves a strain
Back in the saddle again and again
Millions of eyes and none of them friends You better light it up, baby
You better light up that fire
'Cause I don't know what's gonna save me
From the cold now And these sorrows I'm crying over
And these sorrows I'm crying over
Crying over
