

Talk About the Moon

Power & White, Andrew White & Brendan Power

Talk about the moon
Stars shine around your head
Hang onto every word you said
Feel my skin begin to shed
Talk about the moon
Golden glow surrounds you
The mysterious abounds you
I'm so glad I found you
Ah yes
Tell me about the moon
Talk about the moon
Talk about the moon
Something stirs inside you
I know you're always beside me
Always be together
Some kind of way
Tell me about the moon
Talk about the moon
Hundreds of miles
Thousands of smiles
Tears along the way
When I first set eyes on you
Hear those words you say
Hundreds of miles
All the while
Trying to find my way
When I see you
Hear those words you say say say
Talk about the moon
Talk about the moon
Tell me now come closer whisper
Tell me now
I'll tell you my secrets
You tell me yours
Talk about the moon
Tell me your stories
I'll tell you mine
Let's be together now
