These Things

Number One Gun

To know and see you for a time
See through another point of you
And it's you this time
And I feel that you could change my mind
But what would that change
What would that changeAnd these things will never change
For anything or anyone
And you know that I won't leave
For anything or anyone
It's you this timeYou see all the things I cannot see
But I know that you're the one who can save meTo know that you're here
And over and over a again call my name
I know that I know you (again)
