Come on Over

Plain White T's

Come on over, there's a bed to lie on and when
Life gets colder, we'll both have a shoulder to cry on
Come on over, there's so much to do and if
It gets boring, I'll smile just knowing I've got youWe can make it all through the night and baby
It'll be okay but if you can't make it over tonight
Then promise you'll be by someday, be by somedayCome on over, there's a boy that likes you
And where I come from, that's just gotta mean
Something to you, come on over, we can't live forever
If we gotta grow older, we might as well do it togetherWe can make it all through the night and baby
It'll be okay but if you can't make it over tonight
Then promise you'll be by someday, you'll be by somedayIt's just something, a little bit of loving, you could
Never understand and I don't know what I'd do
If I had to see you in the arms of another manIf I had it my way, you'd be here today, no mistake
Would shake it, make it, take it out of the way
You can do it baby, it'll be okayCome on over, there's a bed to lie on and when
Life gets colder, we'll both have a shoulder to cry on
Come on over, we can't live forever, if
We gotta grow older, we might as well do it togetherWe can make it all through the night and baby
It'll be okay but if you can't make it over tonight
Then promise you'll be by someday, you'll be by somedayIt's just something, a little bit of loving, you could
Never understand and i don't know what I'd do
If I had to see you in the arms of another manIf I had it my way, you'd be here today, no mistake
Would shake it, make it, take it out of the way
You can do it baby, it'll be okaySo come on over baby, it'll be okay
