It's My Life

Suncycle

Looking out the airplane window
Thirty thousand miles of shadow
All the silver linings bend into the night
Never any hesitation, never any explanation
I wish I had a ticket of this flight
Everything keeps moving fast
What I want is what I have
Right now, I?m closer than I thought I could be
It?s my life, my time to find the answers
Don?t always know, what kind of road is in front of me
But I?ll go slow, wanna remember every moment
That passes by the goodness ride has ever been
It?s my life
In times I really miss my family
I wonder what they're doing right now
I know they're thinking of me
I can?t imagine where I?m going
But I know where it is I come from
And it makes me feel complete
Everything keeps moving fast

What I want is what I have
Right now, I?m closer than I thought I could be
It?s my life, my time to find the answers
Don?t always know what kind of road is in front of me
But I?ll go slow, wanna remember every moment
That passes by the goodness ride has ever been
It?s my life, it?s my life
And it?s a real good fight trying to find what?s mine
Tryin? to be who I?m supposed to be
It?s my life, it's my time to find the answers
Don?t always know what kind of road is in front of me
But I?ll go slow, wanna remember every moment
That passes by the goodness ride has ever been
It?s my life, my time to find the answers
Don?t always know what kind of road is in front of me
But I?ll go slow, wanna remember every moment
That passes by the goodness ride has ever been
It?s my life
