Every Little Thing

Louisa Wendorff

Slip your hand down to mine
And show me what it means to try this thing called "love"
Guide me through this pitch black maze
and promise me we'll find a way out

And You know
You know

That every little thing, every little thing, every little thing that you do
Makes me feel, makes me feel, makes me feel something new
And Every little thing, every little thing, every little thing that you say
Makes me feel, makes me feel like I am something more than I ever thought I was before

Please be patient, give me time
cause I've been known the change my mind
But even when I do, I keep coming back to

You know
You know

That every little thing, every little thing, every little thing that you do
Makes me feel, makes me feel, makes me feel something new
And Every little thing, every little thing, every little thing that you say
Makes me feel, makes me feel like I am something more than I ever thought I was before

oh, oh, oh, oh, oh

And every little thing, every little thing that you do
Makes me feel, makes me feel something new
And every little thing, every little thing, every little thing that you say
Makes me feel, makes me feel like I am something more than I ever thought I was before

I ever thought I was before
I ever thought I was before
I was before
