

# Twilight Zone

## Spectalicious

First to the bass in to the jam  
Then let the music take command  
Back to back to another dimension  
Stop the force and pay some attention  
    Music to party, music to dance  
The new follow-up of public demand  
    Slick as five da la megaphone  
    Take you down to the twilight zone  
Enter the clock and turn the body upside down  
    Grab the microphone, it's upon the sound  
    You want more, more you get  
    We're 2 Unlimited in effect  
    Check up the sound and stop this distortion  
When we get the fittest, here's another portion  
    Just lay back as we take control  
    Take you down into the twilight zone  
    This is the twilight zone  
    And you're not on your own  
    We'll take you to the twilight zone  
    It is the twilight zone  
    You better shake your bones

And come on down the twilight zone  
Come on baby, I'm gonna take you to the twilight zone  
    Have a good time, take a break  
    Hang with another first of the chapter  
    Straight to the heavyweight for worst or better  
    Fishes in the way, found in the vicinity  
    Slamming DJ's with the rhyme capability  
    Listen to the jam as we go wild  
    Check your MC's versatile  
    Me and the lady, howl megatone  
    Fuck you up in the twilight zone  
    This is the twilight zone  
    And you're not on your own  
    We'll take you to the twilight zone  
    It is the twilight zone  
    You better shake your bones  
And come on down the twilight zone

Hey, yeah, yeah, I'm gonna take you to the twilight zone
