

# Honeybee

## Garbage

You don't even know my name  
You've got me on a ball and chain,  
When you gonna notice me  
God, you're such a little tease When you gonna finally land it on my lips  
When you gonna give me just a little sip You're a honeybee, honeybee  
Honeybee, you're killing me You don't even know my name  
I guess I ought to be ashamed  
Going on the way I do  
Watching you in everything  
When you gonna give me just a little kick  
Music in your heart and lying on your lips You're a honeybee, honeybee  
Honeybee, you're killing me It's hard to stumble when you're on your knees  
But just like nicotine and it gets complicated  
You keep on pouring on the gasoline  
And it's the sweetest feeling, oh it gets me, gets me down You don't even know my name  
How am I gonna reign you in  
Tramping everything you see  
You don't own everything When you gonna give me just a little hit  
When you gonna give me just a little bit You're a honeybee, honeybee  
Oh, honeybee, it's killing me  
You're killing me, honeybee  
You're killing me, my honeybee  
It's killing me
