

Mutiny on the Electronic Bay

Against Me!

it's an into the sunrise aesthetic, let's pretend this is an informed consent. that class division doesn't make an infantry, there is no incentive, no franchise opportunities. and the magazine spreads of fashion models gas masks in hand, it's ok, it's all right, these are situations we learn to live in. when an invasion can bring a country its freedom then unconsciousness is true happiness, no, i don't know what to say.
